

Loss and Bereavement

This CPD course will increase teachers understanding of the many different aspects of loss and grief for the children they are working with.

Teachers will learn more about complex grief responses, deepen their understanding of the effect of loss and change on children and young people and develop additional strategies to support them.

This course will help teachers to:

- Appreciate that none of us can know the significance of a loss for a child
- Become more confident in identifying children who are grieving
- Understand the process of grieving and the impact on children's well-being
- Think about how to stay well whilst working with children who are deeply distressed
