

# Lesson Plan

**NEUROHEADWAY**

---

Neuroscience Into Education

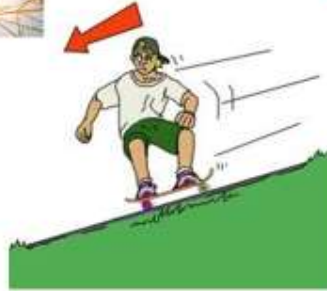

**How would you define energy?**

**Let's discuss about it  
for five minutes,  
give your point of view.**

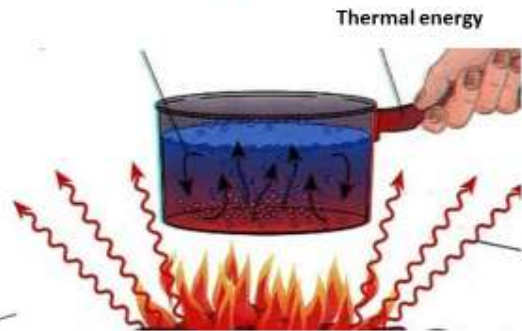

## Different types of energy

Electrical energy

Kinetic energy

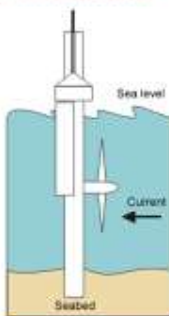

Thermal energy

## Different sources of energy

No carbon dioxide emission

Renewable

Carbon dioxide emission

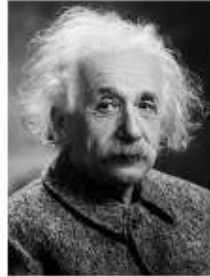

Non Renewable

# Energy is nothing but transformed

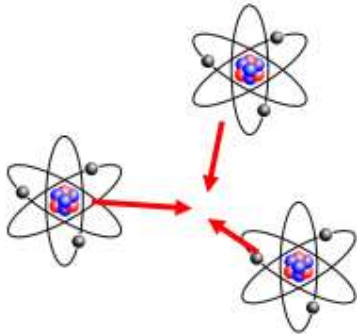

Energy is not created nor destroyed, it is transformed !

Matter is nothing but stocked energy.

# Energy is nothing but transformed

The Sun:

## Energy is nothing but transformed

Solar panel:

## Energy is nothing but transformed

Electric heating:
