Linguistics

Power point with accompanying activity sheet

What is linguistics?

- The scientific study of language and its structure, including the study of grammar, syntax, and phonetics.

What is syntax?

- Arrangements of words and phrases to create well-formed sentences in a language.

What are the definitions of these words?

- Noun
- Verb
- Pronoun
- Adverb
- Adjective
- Preposition
- Conjunction

What is phonetics?

- Classification of different speech sounds.

Exercise

- Looking at different types of scripts and trying to match them to countries/regions/languages.

Activities - Phonetics

- What are nasal, plosive and fricative sounds? (Can students give examples and recognise the differences?)

Activities - Syntax

- What are nasal, plosive and fricative sounds? (Can students give examples and recognise the differences?)

Activities - Syntax

- What are nasal, plosive and fricative sounds? (Can students give examples and recognise the differences?)
