WHAT IS LANGUAGE?

First Question: What is the Main purpose of the human Language?

You may say **COMMUNICATION**

Yes, this is **true**.

But there is another purpose
even more **important**.

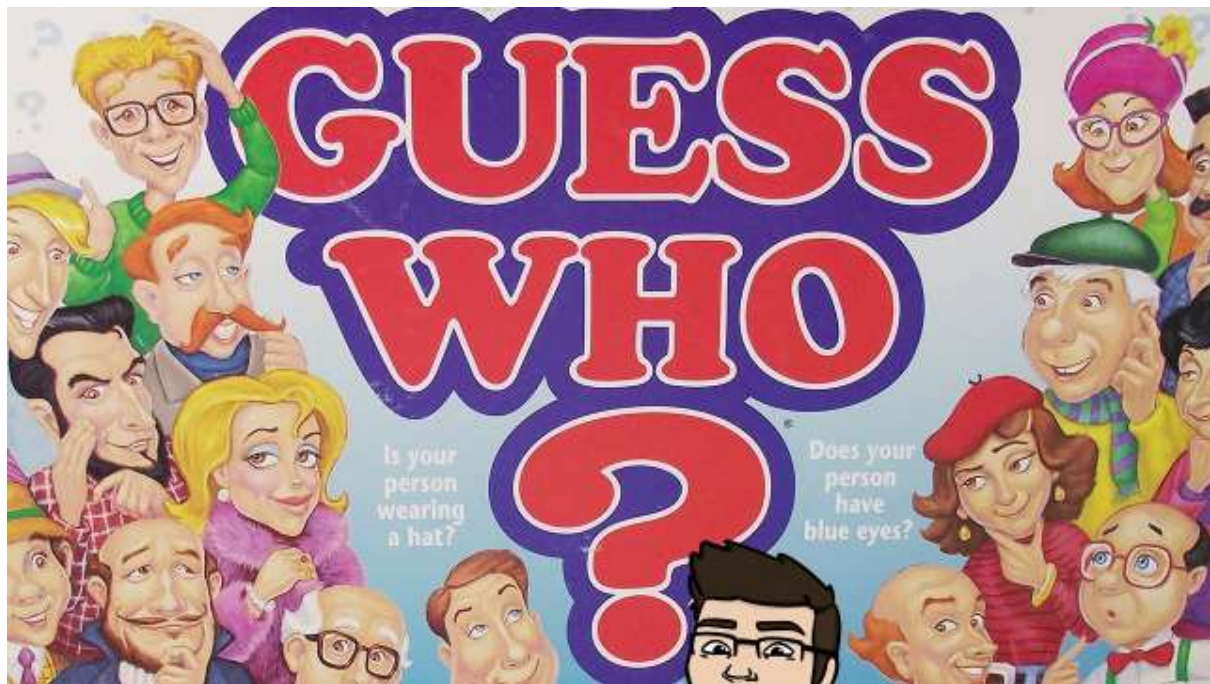

Researchers have discovered
that our memory is also based
on our linguistic capacity.

we remember things in the base
we can speak about them.
And we speak about them with
language.

Of course, memory seems to be something different than language.

In fact, babies and animals can remember a face or a feeling without name it.

But only with language we can evoke these feelings and put a name to that face.

WITH LANGUAGE WE
COMMUNICATE OUR
MEMORIES NOT ONLY TO
THE OTHERS, BUT TO
OURSELVES.

BUT, WHAT IS A
LANGUAGE?
