Capture the alphabet - This is a fun way to gain familiarity with the school layout, practise the alphabet and work as a team as fast as possible!

	Session summary: Against the clock, children each have a digital camera and are tasked to capture snapshots of things around school that spell the alphabet. For example A – apple, B – book etc
Materials/Resources one camera per child/per group Timer for the class	Activity This activity is effective as a 15/30 minute activity. Children are asked to capture shots for as much of the alphabet as possible. Children can work in groups or individually, whichever will work best with your size of group and number of cameras available. Make this a timed exercise which is good for practicing doing things under time pressure and helps them appreciate what can be done in a relatively short time. The idea is that photographs are shown to the class as an alphabet slideshow.
